Professional Summary

Computer Science student and passionate **Flutter Developer** with 1+ year of hands-on experience building cross-platform mobile applications with clean, responsive UIs. Proficient in applying **MVVM** and **Feature-First Architecture**, efficient backend integration using **Firebase** and **RESTful APIs**, and state management (**BLoC, Cubit, Provider**). Strong foundation in data structures, OOP, and problem-solving. Fast learner with solid communication and teamwork skills, eager to contribute to impactful real-world mobile projects.

Education

Faculty of Science, Tanta University **2023 – Present**
Bachelor's Degree in Computer Science *GPA: 3.23 (Very Good)*

Training & Experience

Code Plus **Jul 2026 – Present**
Flutter Developer Intern
- Collaborated within an agile team environment to develop **Animoo**, a cross-platform Flutter mobile application.
- Built responsive user interfaces and modular, reusable Flutter widgets to enhance application scalability and usability.
- Integrated RESTful APIs powered by a PHP backend and managed complex application states using **BLoC/Cubit**.
- Maintained version control using Git & GitHub while strictly adhering to clean code principles and Flutter best practices.

Digital Egypt Pioneers Initiative (DEPI) **Jul 2026 – Present**
Cross-Platform Mobile App Developer Trainee
- Participating in an intensive scholarship program focused on advanced Dart programming and cross-platform development using Flutter.
- Developing full-featured mobile applications integrating Firebase services, RESTful APIs, and state management (**BLoC, Provider**).
- Gaining practical experience in UI/UX guidelines, unit testing, app deployment, and collaborative Capstone project development.

Information Technology Institute (ITI) **Aug 2025 – Sep 2025**
Mobile Application Development Track
- Developed multiple Flutter applications featuring responsive layouts and real-time data handling.
- Integrated backend services including **Firebase Authentication**, **Cloud Firestore**, and RESTful APIs.
- Applied modern UI/UX design practices and clean architectural patterns to optimize code maintainability.

National Telecommunication Institute (NTI) **Jul 2025 – Sep 2025**
Mobile App Development using Flutter
- Mastered core fundamentals of Dart OOP and cross-platform mobile development using the Flutter framework.
- Implemented state management solutions and external API integrations across training projects.

Projects

NewsT – News Reader App | *Flutter, Provider, REST API, Feature-First Architecture, ScreenUtil* **Repo**
- Architected a scalable news application using a **Feature-First structure** and **Repository Pattern** (`BaseNewsRepository` & `BaseApiService`) for clean separation of concerns.
- Managed reactive state via **Provider** (`ChangeNotifier`) with explicit request status handling and custom `SafeNotify` mixins to prevent post-dispose lifecycle leaks.
- Delivered a responsive UI using **ScreenUtil**, featuring category filtering, dynamic search, bookmarks, **Shimmer** loading skeletons, and cached network images.

MooVy – Movie Discovery App | *Flutter, Dart, REST API (TMDB), MVVM, SharedPreferences* **Repo | APK**
- Built a movie discovery application integrated with the **TMDB REST API** to fetch real-time trending movies, ratings, and details.
- Implemented **MVVM Architecture** separating UI, business logic, and data layers using **ValueNotifier** for reactive state management.
- Engineered Infinite Scroll Pagination, Hero Animations, Dynamic Genre Tags, Favorites, and persisted Dark/Light themes via **SharedPreferences**.

NEXA – Full-Featured E-Commerce App | *Flutter, Dart, Firebase Auth, Cloud Firestore* **Repo**
- Developed an end-to-end e-commerce mobile application featuring product browsing, cart management, and order workflows.
- Implemented secure user authentication and real-time database synchronization using **Firebase**, paired with a clean, responsive UI.

Tasky – Task Management App | *Flutter, Provider, SharedPreferences* **Repo**
- Built a lightweight productivity and task management application utilizing **Provider** for state management.
- Utilized **SharedPreferences** for local data persistence, focusing on smooth performance and intuitive usability.

Chaty – Real-Time Chat Application | *Flutter, Dart, Firebase Auth, Cloud Firestore* **2025**
- Developed a real-time instant messaging application powered by **Cloud Firestore** and **Firebase Authentication** with instant message updates.

Technical Skills

Languages: Dart, C++, SQL
Frameworks & UI: Flutter, Custom Widgets, Responsive UI (`ScreenUtil`), Material & Cupertino Design, Shimmer, SVG, Animations
Architecture & State Management: BLoC / Cubit, Provider (`ChangeNotifier`), ValueNotifier, MVVM, Repository Pattern, Clean & Feature-First Architecture
Backend & Networking: Firebase (Auth, Cloud Firestore), RESTful APIs, Dio, HTTP, JSON Serialization
Local Storage: Hive, SQLite, Shared Preferences
Tools & Core Concepts: Git, GitHub, Postman, Android Studio, VS Code, OOP, Data Structures, Algorithms, SOLID Principles
Relevant Coursework: Data Structures, Object-Oriented Programming, Database Systems, Software Engineering
Soft Skills & Languages: Problem Solving, Teamwork, Agile Collaboration, Time Management | **Arabic** (Native), **English** (Very Good)
